TECHNOLOGIES

An all-day protection.

STERI-TECH™

Conceived by WOCK® for environments that require the highest hygiene standards, Steri-tech™ allows sterilization up to 134°C and has antimicrobial and odor resistant properties.

While its antistatic features improve safety, comfort and quality are well assured due to its wear resistance.

Can be found on:

WALKSOFT™

Walksoft™ nature at your feet. The benefits of cork, pushes the boundaries of comfort. Cork not only enhances Walksoft™ resistance to humidity, due to its hydrophobic characteristics, but also has natural inherent properties such as softness and resilience, which makes it naturally perfect for professional use.

GRID DESIGN™

Grid Design™ is a technology developed by WOCK® based on a special and unique grid geometry, combining different surfaces and textures, to achieve the best shock absorption system ever felt.

Its precise and special design allows high flexibility and seamlessly breathability, while offering superior comfort and helping to reduce the risk of micro-lesions in tendons, bones and joints, as well as the feeling of tired legs.

Forget about impacts.

Z-ABSORPTION™

Z-Absorption™ does exactly what its Z shaped internal structure suggests: it acts like a damper which absorbs the impacts from walking or climbing stairs, increasing comfort and protecting articulations.

At the same time, the structure allows for a lighter clog that reduces fatigue and stimulates a perfect posture which ends with the construction of simple and practical clogs. The heel technology was designed to absorb impacts and to prevent micro-injuries, as well as it avoids the feeling of tired legs.

From open air to daily affairs.

FRESHKNIT™

Freshknit™ technology is in the forefront of its category by presenting itself with a flyknit mesh all-over.

We take a leap to bring you a digitally constructed knitting which provides you lightweight, highly adjustable and almost seamless shoe uppers.

Being more flexible and breathable, you can pick up the coolness of a walk in the woods or on the beach to your place of work. It is extremely breathable and allows you to breeze your feet while performing your day-to-day tasks.

ACCESSORIES

CLOG Strap

CLOG Strap offers greater comfort and support to the heel, keeping the foot firmly in place. Available in black and white.

CLOG Steri-tech™ insole

The insole has a special geometry with shock absorption system, which prevents micro lesions occurring in tendons, bones, joints and the feeling of tired legs.

CLOG Walksoft™ insole

With Walksoft™ technology and lined in microfiber, this insole will increase even more the comfort of your CLOG.

CLOG Wedge

This accessory allows the use of customized insoles, making CLOG even more versatile.

BLOC Strap

CLOG Strap offers greater comfort and support to the heel, keeping the foot firmly in place. Available in black and white.

NUBE insole

The insole is produced with an ultra lightweight material lined with fabric and the holes allow the necessary air circulation for continuous drying.

SECURLITE insole

The insole is produced with an ultra lightweight material lined with fabric and the holes allow the necessary air circulation for continuous drying.

EVERLITE insole

The insole is highly flexible and breathable due to its design, while the fabric lining promotes greater comfort.

EVERLITE + insole

The insole is highly flexible and breathable due to its design, while the fabric lining promotes greater comfort.

GLOSSARY

Antislip

The sole is designed to reduce the risk of slipping.

Antistatic

Promotes the dissipation of accumulated static electricity.

Breathable

Regulates the temperature and humidity of the foot.

CE

Regulation (EU) 2016/425 of the European Parliament and of the council of 9 march 2016.

Closed Heel

Additional support for the moments that require extra agility.

EN ISO 20347:2012

ESD

Protects objects and electronic equipment's you work with.

Extra Protection

Absence of ventilation holes avoiding the entrance of speck to the interior of the footwear.

Lemon Scent

The footwear has a fresh and soft fragrance, with a lemon scent.

Optional Insole

Allows you to raise even more your comfort.

Neoprene heel

Ergonomical back heel due to the design and neoprene finishing.

Removable Insole

It's detachable to allow a deeper cleaning.

Removable Strap

Increases comfort and support to the heel, as well as keeps your foot firmly in the footwear.

Safety Toe Cap

Protects the foot from pressure and impacts up to 200 joule.

SATRA

This footwear was tested and approved by SATRA organization.

Shock Absorption

The special design helps to reduce the occurrence of micro-lesions in tendons, bones and joints, and the feeling of tired legs.

Spillage Protection

Allows to choose between extra ventilation or superior protection, which prevents the entrance of liquids into the footwear.

Sterilizable

Produced in an high quality polymer which allows sterilization in autoclave up to 134 °C.

Super Light

Feelite™ technology produces remarkably light, resistant and comfortable footwear.

TÜV

This footwear was tested and approved by TÜV Institute in Germany, for its antislip and antistatic properties.

Unisex

Style designed to be worn by all genders

Upper Liquid Protection

Avoids the entrance of liquids inside the footwear.

Washable

The footwear can be machine washed.

100% Recycled

Raw material from industrial waste, such as: samples, prototypes, burrs and products that do not meet quality standards.
